

## PRESCRIPTION POLICY

EFFECTIVE JUNE 1, 2011

In order to provide the best patient care, we require office visits every three months for long term conditions (including Acne, Allergies, Asthma, Attention Deficit Disorder, and Eczema). We follow the guidelines of the American Academy of Pediatrics by seeing long term conditions quarterly.

At the time of the patient visit, we will provide you with the necessary prescriptions for the next three months. It has become necessary to charge \$10.00 for prescriptions not refilled at the time of the patient visit.

Our intention in providing proactive care is to keep your child healthy and avoid emergent care.
